Import - Export Unit Value Index (MXUVI)

Third Quarter 2018 (Preliminary)

Released Date: December 2018

Introduction

The United Arab Emirates is one of the developed countries that has established its position on the global trade map. It has maintained its position as the most important market for commodity exports and imports in the region. It has also strengthened its role in the international trade arena strongly over the past years. It is expected to witness growth, and prosperity at all levels, including trade in both goods and services, where the movement of exports and imports in the Emirate of Abu Dhabi is an important element in the economic development of the Emirate.

The economic development of the Emirate of Abu Dhabi is an important element in the decision making of the political leadership and government plans for achieving progress and development and keeping pace with the developed world. As a result of this interest, the overall development of the Emirate and development of the national economy has reached advanced global levels through its competitive advantages.

Statistics Center- Abu Dhabi is the official entity responsible for issuing all official statistics, which fulfills the requirements of Abu Dhabi Plan in providing accurate statistical information and data to support the decision-making process. Statistics Center- Abu Dhabi compiled the Import-Export Unit Value Index (MXUVI) through the use of international best practices, methods and methodologies in calculating this index.

Notes

Technical notes

For better understanding of the statistical indicators mentioned in this summary, please refer to the accompanied technical notes on the SCAD website.

Data sources

Data are obtained through Abu Dhabi Customs. The data are processed and passed to the Prices and Income Section at Statistic Centre – Abu Dhabi for further editing and compilation.

Revision statement

The Import-Export Unit Value Index (MXUVI) is prepared on a quarterly basis and the publication is issued within three months of the reference quarter. The figures of the MXUVI are considered preliminary until the next publication. Due to delayed access to prices data from the source. If there is any adjustment to the previous quarter's data, the direct adjustment will be made and the results of this adjustment will be presented in the following quarter. The procedures already established by the PMO are followed in this regard. These measures are in line with the revision policy of the Statistics Center - Abu Dhabi.
