Building Materials Price Statistics

June 2019

Release date: July 2019

Briefing

The monthly publication of Building Materials Price Statistics is of great significance as building material prices are deemed to be important economic indicators for planning and research in various fields. They are also used in the compilation of indices of the construction activity and for the calculation of GDP at constant prices.

Statistical centers all over the world collect prices of building materials used by a large segment of people. As a result of the urban development and the constant growth in the construction sector in the Emirate, Statistics Centre – Abu Dhabi collects price data for these materials on a regular basis.

The movements of prices of 21 groups from the key building materials are included in this publication. This information helps decision and policy makers and researchers in planning and making sound decisions in support of the building materials sector and other sectors associated with it.

Key Points

This publication provides the movement of prices of twenty-one groups of building materials in June 2019 compared with May 2019 and June of 2018. The report also contains the average price of the second quarter 2019 compared with the same period in the previous year and the first quarter 2019. The main results are as follows:

Revision Policy

The building materials prices statistics are prepared on a monthly basis, in the last week of the next month following the reference month, and the results of the calculations of the Building Material Publication are final. Therefore, published building materials price statistics are not subject to future revisions because of new data becoming available. If a mistake is detected, there are procedures that have already been put in place with the Project Management Office to remove/ modify the published error. These procedures are in line with the policy of the Statistics Center - Abu Dhabi.
