Consumer Price Index

October, 2011

(Base year 2007)

Nov 9. 2011

Issue No.2011. SCAD.CPI. No: 10

Executive summary

- The average rise in consumer prices for the first ten months of 2011 was 2.1 per cent, compared with the same period of 2010.
- From October 2010 to October 2011, average consumer prices rose by 0.9 per cent.
- From September 2010 to October 2011, average consumer prices rose by 0.3 per cent.

Table 1: Average CPI and relative change

Year	September	October	Jan – October
	CPI		
2010	121.2	121.7	118.9
2011	122.3	122.7	121.4
	— % —		
Relative change	1.0	0.9	2.1

Relative change is based on the unrounded CPI

- An overall rise in consumer prices during the first ten months of 2011 compared with the same period in 2010 has led to an increase of 4.0 per cent in consumer prices for households of the bottom welfare quintile over the same period of comparison. As for the other welfare levels, consumer prices grew by 1.4 per cent for households of the top quintile and by 2.6 per cent for the middle welfare quintile.
- During the first ten months of 2011 compared with the same period in 2010, consumer prices for national households increased by 2.1 per cent, and by 1.7 per cent for non-national households and 3.6 per cent for collective households.

1. Consumer prices for the first ten months of 2011

Table 2: Weights, relative price index changes and contributions of expenditure groups to the overall percentage points change in CPI, Jan-Oct 2011 compared with Jan-Oct 2010.

Main Expenditure Groups	Weight	Relative change in group CPI's	Contribution to percentage point change in CPI
		— % —	
Food and non-alcoholic beverages	16.1	8.0	64.2
Alcoholic beverages and tobacco	0.3	1.5	0.2
Clothing and footwear	9.8	-14.8	-67.0
Housing, water, electricity, gas and other fuels	37.9	1.8	34.6
Furnishings, household equipment and routine household maintenance	4.8	4.2	9.6
Health	0.8	0.0	0.0
Transport	9.7	6.2	27.8
Communication	7.7	4.5	13.5
Recreation and culture	2.4	1.2	1.3
Education	2.6	4.4	6.9
Restaurants and hotels	3.4	2.3	4.0
Miscellaneous goods and services	4.6	2.3	5.0
Total	100	-	100

Relative change is based on the unrounded CPI.
Source: Statistics Centre - Abu Dhabi

- During the first ten months of 2011, average consumer prices rose by 2.1 per cent compared with the same period of 2010. The CPI rose by 2.5 percentage points over this period.
- The "Food and non-alcoholic beverages" group, accounted for 64.2 per cent of the percentage point rise in the index, due to increases in the prices of most of the subgroups included in this group. The highest price

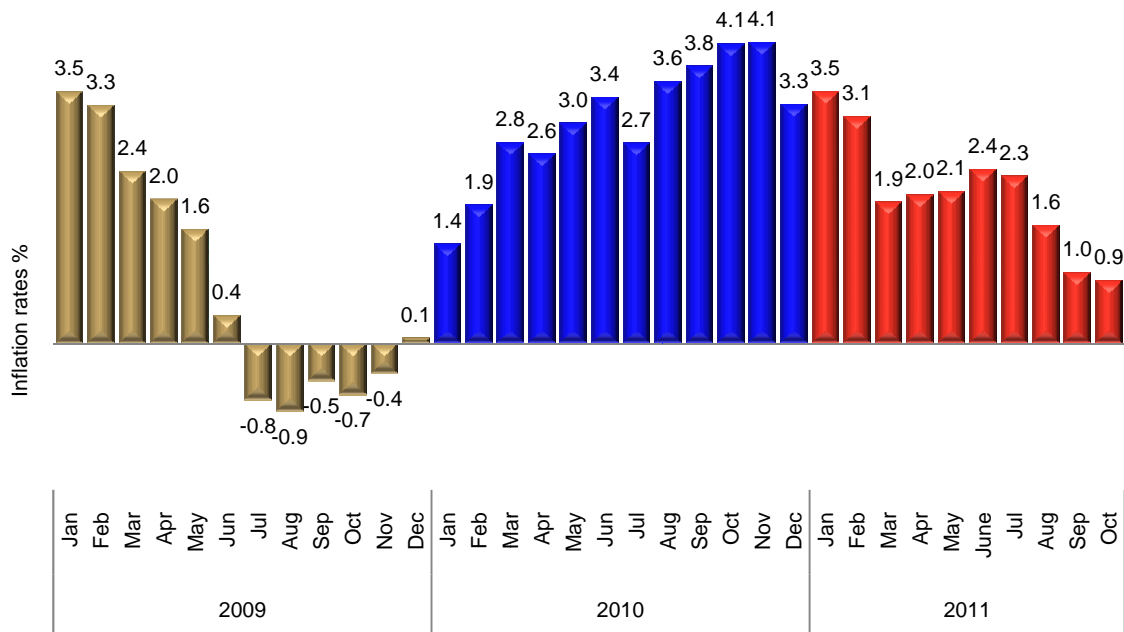

increases were in the "Meat" and "Coffee, tea and cocoa" subgroups which each rose by 14.3 per cent, followed by "Fruits" (11.4 per cent), "Mineral waters, soft drinks, fruit and vegetable juices" (8.7 per cent), and "Bread and cereals" (7.0 per cent).

- The next highest group contributor to the overall year-to-date increase in the CPI over the first ten months of 2011 was "Housing, water, electricity, gas and other fuels" which accounted for 34.6 per cent of the increase in the CPI. While prices for this group increased by only 1.8 per cent, the size of the contribution reflects the large weight for this group in the index.
- The "Transport" group contributed 27.8 per cent to the year-to-date rise in consumer prices, having increased by 6.2 per cent.
- The "Communications" group contributed 13.5 per cent of the CPI percentage points increase during the first ten months of 2011 and increased by 4.5 per cent compared with the same period in 2010.
- The main group that slowed down the rise in consumer prices during the first ten months of 2011 compared with the same period of 2010 was "Clothing and footwear" which contributed a negative 67 per cent of the overall change in the CPI index. The average prices of this group decreased by 14.8 per cent.

2. Consumer prices for October 2011

- Over the year, that is, for October 2011 compared with October 2010, average consumer prices increased by 0.9 per cent. The most significant individual increase came from higher prices for "Restaurants and hotels" which rose by 8.0 per cent, followed by "Alcoholic beverages and tobacco" (7.4 per cent) and "Food and non-alcoholic beverages" (5.8 per cent). Over the same period, prices of the "Clothing and footwear" group decreased by 11.3 per cent.
- Over the month, that is, for October 2011 compared with September 2011, average consumer prices increased by 0.3 per cent. The most significant individual increase came from higher prices for "Restaurants and hotels" which rose by 3.1 per cent over the month.

3. Consumer price by household welfare level for October 2011

- Consumer prices for the households of the bottom welfare quintile increased by 4.0 per cent during the first ten months of 2011 compared with the same period in 2010. The corresponding rise for other welfare levels was 1.4 per cent for households of the top quintile and 2.6 per cent for the middle quintile while prices for the bottom middle welfare quintile increased by 3.1 per cent.
- Consumer prices for households in the bottom welfare level increased by 2.0 per cent in October 2011 compared with October 2010 and in the top welfare level by 0.4 per cent. The prices for households in the middle welfare level increased by 1.3 per cent.
- Consumer prices increased in October 2011 compared with September 2011 for all welfare levels. Prices in the bottom welfare level rose by 0.6

per cent and in the middle welfare levels and the top welfare level by 0.3 per cent respectively.

4. Consumer price by household type for October 2011

- During the first ten months of 2011, consumer prices for national households increased by 2.1 per cent, 1.7 per cent for non-national households and 3.6 per cent for collective households.
- The rise in consumer prices by 0.9 per cent in October 2011 compared with October 2010 reflected a rise in consumer prices for national households of 0.9 per cent during the same period. Prices for non-national households increased by 0.7 per cent, while prices for collective households increased by 1.8 per cent.
- Compared with September 2011, consumer prices for October 2011 increased by 0.3 per cent for national and non-national households and 0.6 per cent for collective households

Next release

Consumer price index, November 2011, will be released on 10December 2011. For more information on prices and other official statistics, please visit the SCAD website at <http://www.scad.ae>

Consumer Price Index (CPI) Calculation Methodology

The CPI is a mathematical average that measures the rate of change in the prices of a basket of goods and services purchased by representative households between two time periods. The period against which prices are compared is known as the base period and the period under review is known as the comparison period.

1- Sources of Goods and Services

The sources used for collection of price data were determined through field visits conducted by a team from SCAD's Price Indices Section. These sources are updated on a regular basis e.g. when any source closes down or relocates premises. Price data are currently collected from 117 sources.

2- Collection of Price Data

The CPI basket is collected every month, except for the group of vegetables, fruit, meat, fish, and chicken for which price data are collected every week due to price fluctuations in these items. Data on home rentals are collected on a quarterly basis, and school tuition fees semi-annually. The index is calculated using 2007 as the base year for the Abu Dhabi region, with a basket consisting of 334 goods and services and a consumer basket consisting of 670 goods and services.

3 - Weights

The weights (relative importance) of goods and services are calculated using the results of the 2007-08 Household Income and Expenditure Survey. Goods or services with a weight of 0.002 per cent or more were included in the CPI basket of goods and services. Goods with weights below this value were distributed proportionally among the other goods in the same group.

4- Compilation of the CPI

The CPI is calculated using the Laspeyres method which uses fixed base-year weights:

$$CPI_L = \sum \frac{P_{1i}}{P_{0i}} \times W_{0i}$$

The average prices of items in the basket are calculated using the geometric mean of elementary aggregates. Price ratios are calculated by dividing the comparison price by the base price. The price ratios are then multiplied by their appropriate base weights, and are then summed to form the average index.

The index for house rentals is calculated separately using a moving base. This figure is calculated on a quarterly basis.

In addition to the general CPI for all Abu Dhabi Emirate, the CPI is also constructed for five welfare levels classified according to annual household income quintiles. In addition, the CPI by household type is constructed for the classifications of household type: national, non-national and collective households. A collective household means two or more unrelated persons living in one housing unit and sharing their living arrangements.
