# Livestock Statistics 2013

Issued in September 2014

## **Introduction**

The livestock sector contributes to the diversification of income sources, food security and job creation, it also provides some households needs (within the secondary activities), where many households raise animals to meet their needs and sell the surplus.

The livestock sector, which includes livestock, commercial farms and fisheries, pays a great attention to breeding using advanced methods, especially in poultry and cattle breeding. The sector also contributes to the national income.

This bulletin highlights in details the fields related to the livestock sector; it includes a large number of significant indicators that help to study and analyze trends in the sector. This will help to create future plans and strategies to achieve sustainable development in line with Abu Dhabi Vision 2030.

The second edition of the bulletin includes detailed data on livestock numbers by type, gender and age groups, it also provide data on commercial farms, which are classified into cattle farms, broiler chicken farms, layers chicken farms and mother hens farms. A farm may specialize in one type or more of livestock production. This publication contains data on fisheries, which is one of the most important sub-activities in the sector.

# **1. Livestock Statistics**

## **1.1 Introduction**

The livestock sector is regarded as one of the pillars of development and integration in the emirate of Abu Dhabi, and one of the most important activities of the agricultural sector in emirate of Abu Dhabi.

The statistics Centre – Abu Dhabi (SCAD) was covetous to follow the latest statistical methodologies in data collection and processing and in estimating indicators related to livestock. These indicators are of great importance for policy formulation, and the preparation of future plans and programs to meet the increasing demand on livestock production due to population growth, and consequently to bridge the gap between production and consumption to adjust the balance of trade.

This bulletin includes the results of livestock number by type, and region, and it includes data about of the commercial farm 2013.

### **3. Fish Production Statistics**

### **3.1 Introduction**

Fisheries is one of the most important sub-activities in the agricultural sector, as it contributes to the employment of labor and provides a decent life for a number of residents in the coastal areas, in addition to providing essential products for food consumption in the Emirate.

The global demand for fish is steadily increasing with the expectation it will continue to rise due to population growth and rising incomes. The Emirate of Abu Dhabi enjoys a costal line that exceeds 500 kilometers, accommodating various marine life. The UAE territorial water contains more than 200 islands of various size and historical and economic importance.

The amount of fish caught in 2013 totaled 3,862 tons, indecrease of 12.2% compared with 2012. The estimated value of fish production amounted to about AED 84.8 million and it was caught in around 22,735 fishing trips, including 80% with tarad and 20% with lansh.

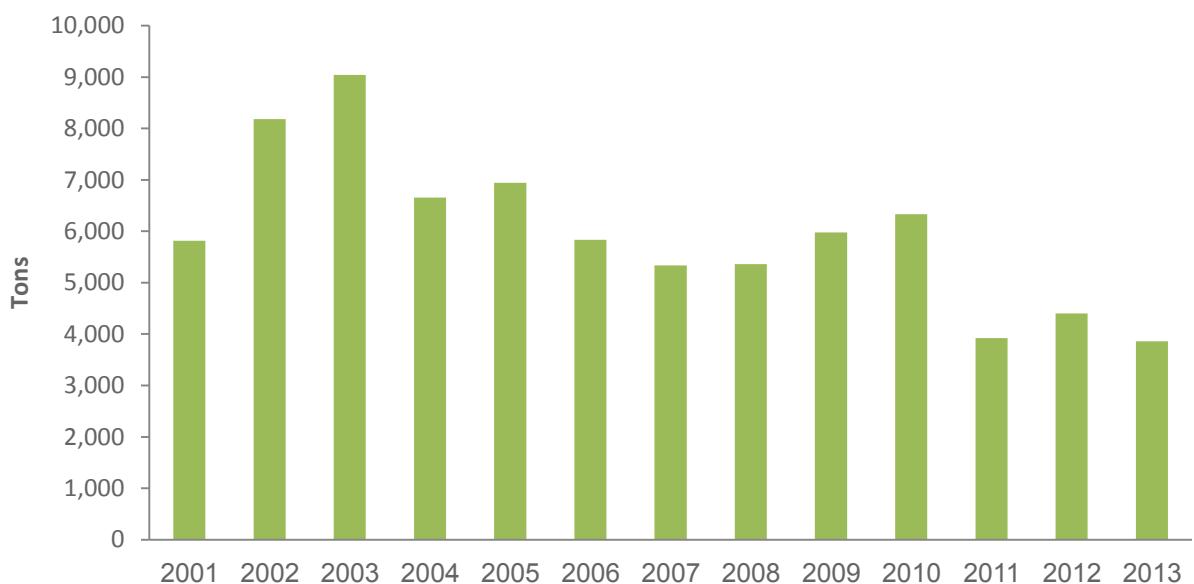

Scombridae accounted for the highest value of caught fish, with AED 29.2 million or 34.5% of the total value of the catch in 2013. This was followed by Epinephelidae worth 27.9 million dirhams or 32.9%, Lethrinidae with AED 12.2 million or 14.4% and Carangidae with AED 7.5 million or 8.8% of the total value.

## **Explanatory Notes**

### **Data Sources**

Abu Dhabi food control authority, Environment Agency - Abu Dhabi and Department of Municipal Affairs (Municipality of Abu Dhabi- Municipality of Al Ain- Municipality of Al Gharbia).

### **Technical Notes**

#### **Methodology Adopted**

The statistics Centre – Abu Dhabi (SCAD) was covetous to follow the latest statistical methodologies in data collection and processing and in estimating indicators related to livestock, commercial farms and fish production statistics

#### **Notes on Tables**

1. Data of the sole parents' farm in the UAE is not published to maintain confidentiality of the data and non-disclosure of individual data.
2. Data on cattle in tables (1.10- 1.11- 1.12- 1.13) includes data of animal holdings in the traditional holdings and doesn't include commercial farms.
3. Some figures have been rounded to the nearest final digit shown. Consequently, discrepancies may exist within a table between totals and sums of constituent items.

#### **More Information and Next Release**

For more information about livestock statistics and agricultural statistics, please visit the statistics link on the SCAD website at <http://www.scad.ae>

The next release is expected in September 2015 for 2014 data.
