Introduction

The livestock sector contributes to the diversification of income sources, food security and job creation, it also provides some households needs (within the secondary activities), where many households raise animals to meet their needs and sell the surplus.

The livestock sector, which includes livestock, commercial farms and fisheries, pays a great attention to breeding using advanced methods, especially in poultry and cattle breeding. The sector also contributes to the national income.

This bulletin highlights in details the fields related to the livestock sector; it includes a large number of significant indicators that help to study and analyze trends in the sector. This will help to create future plans and strategies to achieve sustainable development in line with Abu Dhabi.

The second edition of the bulletin includes detailed data on livestock numbers by type, gender and age groups, it also provide data on commercial farms, which are classified into cattle farms, broiler chicken farms, layers chicken farms and mother hens farms. A farm may specialize in one type or more of livestock production. This publication contains data on fisheries, which is one of the most important sub-activities in the sector.

Summary of Indicators

The bulletin consists of a number of charts and table that include detailed statistical data of the livestock sector for 2019. The key indicators of Abu Dhabi of livestock sector are listed below:

Livestock Statistics (Traditional Holdings)

Indicator		
Number of Animal Holdings	number	25,087
Number of Sheep	number	1,662,890
Number of Goats	number	1,316,678
Number of Cattle	number	50,435
Number of Camels	number	442,018

Commercial Farms Statistics

Indicator		
Number of Broiler Farms	number	11
Number of Layer Farms	number	9
Number of Parent Stock Farms	number	2
Number of Cattle's Farms	number	16
Number of Cattle's	number	30,000
Number of Milking Cows	number	14,940
Quantity of Cow Milk	ton	150,305
Quantity of Chicken Meat	ton	24,632
Quantity of Table Eggs Production	000 egg	566,359
Quantity of Hatchery Eggs Production	000 egg	20,205
Quantity of Organizing Manure	ton	187,728

Fish Production Statistics

Indicator		
Quantity of Fish Catch	ton	2,598.0
Value of Fish Catch	Million AED	57.2
Number of Fishermen	No.	3,894.0
Number of Fishing Boats	No.	862.0

1. Livestock Statistics

1.1 Livestock Statistics

The livestock sector is regarded as one of the pillars of development and integration in the emirate of Abu Dhabi, and one of the most important activities of the agricultural sector in emirate of Abu Dhabi.

The statistics Centre – Abu Dhabi (SCAD) was covetous to follow the latest statistical methodologies in data collection and processing and in estimating indicators related to livestock. These indicators are of great importance for policy formulation, and the preparation of future plans and programs to meet the increasing demand on livestock production due to population growth, and consequently to bridge the gap between production and consumption to adjust the balance of trade.

This bulletin includes the results of livestock number by type, and region, and it includes data about of the commercial farm 2019.

Table 1.1: Number of livestock in Traditional Holdings by Type, 2014 to 2019

Year	Total	Sheep	Goats	Cattle	Camles
2014	3,403,088	1,722,965	1,272,385	30,010	377,728
2015	3,519,561	1,772,778	1,311,699	51,197	383,887
2016	3,514,570	1,760,553	1,312,803	46,990	394,224
2017	3,545,000	1,757,481	1,337,090	41,959	408,470
2018	3,599,749	1,771,922	1,382,341	40,326	405,160
2019	3,472,021	1,662,890	1,316,678	50,435	442,018

3. Fish Production Statistics

3.1 Fish Production Statistics

Fisheries is one of the most important sub-activities in the agricultural sector, as it contributes to the employment of labor and provides a decent life for a number of residents in the coastal areas, in addition to providing essential products for food consumption in the Emirate.

The global demand for fish is steadily increasing with the expectation it will continue to rise due to population growth and rising incomes. The Emirate of Abu Dhabi enjoys a coastal line that exceeds 500 kilometers, accommodating various marine life. The UAE territorial water contains more than 200 islands of various size and historical and economic importance.

The amount of fish caught in 2019 totaled 2,598 tons, decrease of 46.9% compared with 2018. The estimated value of fish production amounted to about AED 57.2 million and it was caught in around 35,546 fishing trips, including 60.1% , 3.6% with tarad, lansh respectively and 36.6% with nezha in 2019.

Epinephelidae accounted for the highest value of caught fish, with AED 16.4 million or 28.7% of the total value of the catch in 2019. This was followed by Scombridae worth 14.2 million dirhams or 24.8%, Carangidae with AED 8.7 million or 15.2% and Lethrinidae with AED 4.3 million or 7.5% of the total value of catch in 2019.

Livestock and Fisheries Statistical Methodology

The statistics Centre – Abu Dhabi (SCAD) was covetous to follow the latest statistical methodologies in data collection and processing and in estimating indicators related to livestock, commercial farms and fish production statistics

1. Overview

The livestock and fisheries statistics present detailed statistics on the composition of the livestock sector, which contributes to the diversification of income sources, boosts food security, and provides employment opportunities, besides covering part of the needs of families as part of the secondary activities of households. The livestock sub-activity, which includes: (livestock populations and commercial farms) is increasingly using modern production equipment and techniques, especially in the field of poultry and cattle farms, gaining further significance as contributor to the national income. The livestock statistics also contains detailed data on fisheries, considering that fishing is an important of economic activity in the Emirate of Abu Dhabi. Fish stocks assessment is a process that requires regular and periodic and effective monitoring of fish populations and the exploitation of fisheries, since data on the catch and fishing pressure, together with fish statistics, are necessary for effective management of fisheries, thereby contributing to the development and sustainability of the fishing sector.

2. Importance

Livestock, commercial farms and fisheries data support scientific research in the agricultural sector, help policy and decision makers develop future plans for the advancement of the livestock and fisheries sector and promote the concept of food security.

3. Objectives

Livestock statistics seek to provide data on the composition of the livestock sector, which includes (livestock numbers, commercial farms) detailed by regions in the emirate and covering the size and distribution of livestock populations, the quantities of animal production, animal health data, commercial farm data by farm type, etc.

The fisheries statistics aim to provide fish data production quantitative by value and volume, along with data on the quantities and values of production inputs by fish families and landing sites, fishing methods, month, size of employment in fishing activities, etc.

4. Concepts and Definitions

The Dictionary of Terminology used by Statistics Center Abu Dhabi, published on the SCAD's website, provides a list of the terms and concepts used in livestock and fisheries statistics, giving definitions of the terms and their international reference source. The dictionary can be accessed through the link below:

<https://www.scad.gov.ae/ar/pages/ManualClassification.aspx>

SCAD Glossary

5. Coverage

- Geographical coverage of livestock statistics:
 1. Abu Dhabi
 2. Al Ain
 3. Al-Dhafra
- Livestock statistical units:
 1. Livestock holdings.
 2. Commercial farms.
- Fisheries statistics cover fishing data by landing site:
 1. Free Port
 2. Al Sadar
 3. Delma
 4. Al Marfa
 5. Al Bateen
 6. Al Saadiyat
 7. Al Sila

6. Periodicity

Annual

7. Classifications

The classification of agricultural data use's FAO's internationally endorsed and classifications set out in the guidelines of the World Programme for the Census of Agriculture 2020.

8. Main Data Source

Administrative records of the following entities:

1. Abu Dhabi Agriculture and Food Safety Authority
2. Environment Authority Abu Dhabi
3. Department of Municipalities and Transport / Abu Dhabi Municipality
4. Department of Municipalities and Transport / Al Ain Municipality
5. Department of Municipalities and Transport / Al-Dhafra Municipality

9. Data Collection

Livestock and fisheries data from data providers are collected using e-mail, electronic links and official letters.

10. Data Auditing

1. Checking the data by applying the matching rules between linked tables.
2. Ascertaining completeness and coverage of all required table data.
3. Checking and correcting the data for any errors, discrepancies or outlying values.
4. Imputation for missing values and anomalous values.
5. Comparison of the data with statistics of previous cycles (time series data).
6. Comparison of the statistical figures produced with other relevant data (internal and external if available).
7. Elimination of any conflicting figures in the statistics produced.

11. Indicators Calculation

Statistical outputs are compiled using mathematical formulas or aggregations and reclassification of input data prior to publication. In the processing of missing values are imputed, data harmony and consistency is ascertained, the relative and absolute difference between the variable value sourced from administrative records of the current period and its value in previous periods is measured, adjustment is carried out for any errors. Output tables are then prepared and categorized by topic within the livestock and fisheries publication.

12. Timelines

- Current release: September 2020 for 2019 data
- Next release: September 2021 for 2020 data

13. Dissemination

The data is published in the form of statistical tables or uploaded versions on the website.

Notes on Tables

1. Source of Number of livestock from: The Animal Identification and Registration System, livestock numbering.
2. Some figures have been rounded to the nearest final digit shown. Consequently, discrepancies may exist within a table between totals and sums of constituent items.

More Information and Next Release:

For more information about livestock statistics and agricultural statistics, please visit the statistics link on the SCAD website at <http://www.scad.ae>

The next release is expected in September 2021 for 2020 data.
